EDUCATION

UNDERGRADUATE

VIT UNIVERSITY

B.TECH, ELECTRONICS &
COMMUNICATION

2013 - 2017 | Chennai, India

HIGHER SECONDARY

ATOMIC ENERGY SENIOR
SECONDARY SCHOOL

2012 | Mysore, India

SECONDARY

ATOMIC ENERGY CENTRAL
SCHOOL

2010 | Mysore, India

BOOTCAMP

TECHNOLOGY EXPONENT

PROGRAM | PRODUCT ENGINEERING
SCHOOL OF ACCELERATED
LEARNING

Jan 2018 - Apr 2018 |
Hyderabad, India

SKILLS

PROGRAMMING

JavaScript • JQuery • NodeJS
ExpressJS • MongoDB • React
ReactNative • Typescript • Redux
Git workflow • Jira • GraphQL
HTML5 • CSS • Styled-component
Webpack • Gulp • WebSockets
SASS • Apollo Client • AWS IoT

SOFT & OTHERS

#Quick learner #Lateral Thinking
#Communication #First Principles
#Multitasking #Design Thinking
#Collaboration | Pair Programming
#Attention to detail

LANGUAGES

Tamil • English • Kannada
Malayalam • Hindi • Telugu
French (elementary) • Chinese
(HSK 2)

WORK EXPERIENCE

AUXO LABS FRONT-END DEVELOPER

Jun 2018 - Sept 2020 |

CARIE

A Telehealth platform that connects patients with doctors providing virtual consultation and online e-prescription.

- Developed the Front-end client application on React, Flow, React-router and Redux.
- Managed the GraphQL data with Apollo client.
- Used third party APIs like Google Maps and Places API for a standalone Find-a-Doctor portal, Twilio for video consultation, DoseSpot for e-prescription.
- Built highly re-useable React components and use storybook to create the documentation of controlled components.

FLASHSCRIBE

An AI-driven Transcription application that is backed by a indic language automated speech recognition(ASR) engine.

- Designed, Developed and Structured the Front-end from ideation phase on React.
- Implemented and hooked a live video player to control features on editor; live text highlight and time segment based text insertion.
- Implemented a custom translation and trasliteration indic keyboard.

CASCADE

A Healthcare platform that predicts the Health hazards of a patients based on the vocal encounter with the doctors.

- Restructured, Refactored and maintained a React based inference module of it, interfacing with this AngularJS based application.

PURPLEGRIDS INC. SENIOR UI DEVELOPER

Sept 2020 - July 2023 |

Purplegrids is provider of an AI-powered platform that enhances the customer engagement using chatbots, flowbots and robots. As a pivotal member of Purplegrids' small front-end team, I played a crucial role in building and evolving their AI platform. From channel integrations to intuitive visual builders, I designed and developed key modules, empowering non-technical users to harness the power of AI.

- Crafted user-friendly visual builders for both chatbots and robot workflows, democratizing AI implementation through drag-and-drop simplicity.
- Architected and built seamless channel integrations, connecting Purplecloud to diverse platforms for streamlined workflow automation.
- Developed a library of dynamic components, empowering users to create AI-powered chatbot flows with ease and creativity.
- Owned development and maintenance of essential modules like payments, orders, and settings, ensuring a smooth user experience across the platform.
- Enhanced platform performance and scalability through Node.js microservices, ensuring a robust and responsive user experience. Built and maintained 3 Node.js microservices along with client-side chatbot.
